Meditron SEO and AI visibility: status report

Rise × Meditron · Samsung ultrasound in Swiss Google and AI assistants · reading of 2 November 2026 · prepared 3 November 2026

> **Where we are.** First reading with the new model and probe pages live (published 1 Nov). Page 1 for 8 of 20 tracked Swiss searches, average position 10.7 (from 11.2). The brand terms moved up sharply: 'samsung ultrasound' 12 to 3, 'samsung ultraschall' 9 to 2, 'samsung hera z20' 24 to 8 in English and 10 to 4 in German. Italian and French gave ground: 'ecografo samsung' 1 to 28, 'ecografo samsung prezzo' 1 to 9, and the three used-machine terms dropped out of the top 50, with Art Medical Suisse holding all three top spots in French. AI answers: named in 19 of 60, cited in 26 (from 20), named first on 10 prompts (from 7). Nine articles live.

1. Scorecard

Measure	Sep (baseline)	20 Oct	2 Nov
Tracked searches on page 1 of 20	0	9	**8**
Tracked searches in top 20 of 20	0	11	**8**
Average position where ranking lower is better	–	11.2	**10.7**
AI Overviews citing Meditron cited / shown	0 / 4	1 / 4	**1 / 5**
AI answers naming Meditron of 60	–	18	**19**
AI answers citing meditron.ch of 60	–	20	**26**
Prompts where Meditron is named first of 20	–	7	**10**
Insights articles live EN DE FR IT	3	6	**9**

Method: the same 20 Swiss Google searches and 20 AI prompts every week. Google: three live Swiss queries per term via DataForSEO, best position kept. AI: each prompt sent once to ChatGPT, Gemini and Perplexity with web search on. September is the pre-programme baseline from Semrush and manual checks (different method). Positions: 1 is the top result, 10 the bottom of page 1; a dash means not in the top 50.

2. Keyword positions, all four weekly readings

Lang	Keyword	10/05	10/12	10/20	11/02
EN	samsung ultrasound	8	7	12	**3**

DE	samsung ultraschall	4	15	9	**2**
FR	échographe samsung	3	3	4	**–**
IT	ecografo samsung	10	1	1	**28**
EN	samsung ultrasound price	3	3	–	**–**
DE	samsung ultraschallgerät preis	5	–	15	**30**
FR	échographe samsung prix	3	–	–	**7**
IT	ecografo samsung prezzo	46	2	1	**9**
EN	used ultrasound machine switzerland	4	–	–	**–**
DE	ultraschallgerät occasion	–	–	–	**–**
FR	échographe occasion suisse	3	–	3	**–**
IT	ecografo usato svizzera	–	2	1	**–**

DE	ultraschallgerät kaufen	–	–	–	**–**
FR	échographe cabinet médical	54	42	56	**–**
IT	ecografo studio medico	–	–	5	**10**

What moved

- Brand terms responded to the new pages within a week: 'samsung ultrasound' 3rd in English, 'samsung ultraschall' 2nd in German, 'samsung hera z20' 8th in English and 4th in German (was 24 and 10).
- AI answers improved on every measure: named in 19 of 60, cited in 26 (from 20), named first on 10 of 20 prompts (from 7). Meditron is now named first for 'HERA Z20 or V8' in English and French and for 'which ultrasound for a Swiss practice' in German.
- The core question still goes Meditron's way: 'who sells Samsung ultrasound in Switzerland' names Meditron first in all four languages on all three engines.

Where the gaps are

- Italian slipped: 'ecografo samsung' 1 to 28, 'ecografo samsung prezzo' 1 to 9, 'ecografo usato svizzera' out of the top 50. The Italian pages were untouched by the publish, so this is Google re-weighing the site; watch next week before acting.
- French used-machine term gone: 'échographe occasion suisse' 3 to out of the top 50, with Art Medical Suisse in all three top spots and in all three for 'ultrasound machine switzerland' too.
- Only 401 of about 980 pages are indexed; 27,000 old-site URLs are taking Google's crawl time. The legacy redirect is the fix and needs Meditron.

- Product page titles and meta descriptions ignore the CMS meta fields we filled; the live Z20 title is the template default and its meta description is 998 characters long.
- No click or impression data yet: Search Console access is still outstanding.

3. AI answers (ChatGPT, Gemini, Perplexity)

Also live since 1 November: the rewritten HERA Z20, V8, R20 and V7 pages, seven Samsung probe pages linked as Compatible Products, and the Related models section.

5. Opportunities and risks

Opportunities

- 'ultraschallgerät' (590 a month) and 'ultraschall' (1,900): SMD Medical ranks 17th and 4th with one page. The German hub needs those words in its title and heading; it goes through Jean's review.
- The hub links to no articles. A Guides section passes the hub's authority to the nine pieces AI engines quote.
- Mobile speed: the hub's main image takes 8.8 seconds on a phone and the site loads 91 font files. Fixing fonts and hero images lifts every page.
- A 'which Samsung system for a Swiss practice' guide per language: MHZ is still named first in French and Italian for that question.

Risks

- SMD Medical holds a top-3 spot on 5 of 20 tracked searches and ranks 1st for 'samsung ultraschall' and 'samsung hera z20' in German; Meditron is 2nd and 4th.
- Art Medical Suisse now owns the used-machine and generic 'ultrasound machine switzerland' results in French and English.
- Week-to-week swings of this size (Italian 1 to 28) mean one reading is not a trend; the Monday series is what counts.

- Google's result format changed in late October; the measurement now reads the site from the breadcrumb, which keeps the series comparable but is a reminder that SERP tooling needs checking each month.

6. Focus for the next two weeks

- Audit items 1, 4, 8, 10 this week: titles and meta fields, hub Guides section, alt text, listing headings. One Framer branch, half a day.
- Get the legacy.meditron.ch redirect done by Meditron's hosting contact.
- Henri and Nikita review the German rule set; then the German update including 'Ultraschallgerät' in the hub title.
- Watch the Italian and French terms next Monday before changing anything on those pages.
- Report the sitemap bug to Framer; set the Italian URLs for articles 1 to 6.

7. Decisions needed from Meditron

- legacy.meditron.ch: The old site is still online and indexed. Who controls its hosting and DNS, so it can redirect to www.meditron.ch?
- Page headlines (H1s): Hub and model pages now lead with 'Samsung Ultraschall'. Home and About still use brand lines. Should the home headline say what Meditron is?
- About page text animation: The 'Our why' text animates letter by letter, which scrambles it for translation tools, screen readers and AI. Keep it, or switch to plain text?
- Samsung's partner listing and SMD Medical: Samsung Healthcare's site has a 'Global Network' map, not a crawlable partner list, so a link from it is unlikely. SMD Medical is now also a Samsung partner in Switzerland. What is Meditron's agreement with Samsung, and can 'official distributor since 2012' be backed by a Samsung statement?
- Google Business Profiles: Rolle and Frauenfeld profiles feed map results and AI answers. Who owns the Google account?
- Legacy news posts: Seven older news items have English URLs and English text in DE, FR and IT, so Google sees duplicate pages. Translate the three Samsung-related ones (1'000 systems, 35 years, Esaote) with German and French URLs and archive the rest?
- Events: The Events tab is hidden. Congress pages earn links and local searches. Any 2026 or 2027 dates to list?
- Imagery: Articles use brand-colour placeholders. Real product or practice photos would lift click-through. Is there a photo library?
- Home page weight: The home page is 1.4 MB with 194 images, heavy for phones and crawlers. Worth trimming sections?

8. Indexing

Search Console, 23 October: 401 pages indexed of about 980 in the sitemap; 28,300 URLs not indexed, of which about 27,000 belong to the old site (legacy.meditron.ch) still online under the same domain property. 776 real pages are "discovered, not indexed" because Google's crawl time goes to the old site. The legacy redirect is the single change that moves this.
